DETAILED ACTION

Response to Arguments

1. Regarding Applicant's argument with respect to the 35 U.S.C. § 101 rejections of claims 31 and 32, Examiner provides the following rationale:

A transitory, propagating signal is not a "process, machine, manufacture, or composition of matter." Those four categories define the explicit scope and reach of subject matter patentable under 35 U.S.C. § 101; thus, such a signal cannot be patentable subject matter. *In re Nuijten*, 500 F.3d 1346, 1357 (Fed. Cir. 2007). "If a claim covers material not found in any of the four statutory categories, that claim falls outside the plainly expressed scope of § 101 even if the subject matter is otherwise new and useful." *Id.* at 1354.

Even when a claim covers patentable subject matter within the scope of 35 U.S.C. § 101, if the claim also covers subject matter that would be unpatentable under § 101, then applicant must limit the claim to avoid the nonstatutory subject matter to in turn avoid a rejection under § 101. *Cf. Amgen, Inc. v. Hoechst Marion Roussel, Inc.*, 314 F.3d 1313, 1329 (Fed. Cir. 2003) ("By limiting the claims in this way Amgen simply avoids claiming specific subject matter that would be unpatentable under § 101."); *see also* MPEP § 2105 ("If the broadest reasonable interpretation of the claimed invention as a whole encompasses a human being, then a rejection under 35 U.S.C. 101 must be made indicating that the claimed invention is directed to nonstatutory subject matter.").

Claims 31 and 32 are each directed to "A computer readable medium" which Applicant defines as "any one of many physical media such as, for example, electronic, magnetic, optical, electromagnetic, infrared, or semiconductor media (Spec., par. 51). Applicant goes on to provide computer readable medium examples which include "a portable magnetic computer diskette such as floppy diskettes or hard drives, a random access memory (RAM), a read-only memory (ROM), an erasable programmable read-only memory, or a portable compact disc." (Spec., par. 51).

Examiner concludes that optical, electromagnetic and infrared are considered carrier signals (signals per se) and are not found in any of the four statutory categories; therefore, Applicant has agreed (via telephonic interview conducted on February 20, 2009) to omit the sentence (Spec., par. 51) which describes the physical media that a computer readable medium can comprise. Please see Examiner's Amendment.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Steven R. Ormiston (35,974) on February 20, 2009.

The application has been amended as follows: Specification, par. 51, replace the Specification, par. 51 dated 09/26/2008 with the following:

[0051] In the block diagrams of Figs. 3-6, each programming block may represent a module, segment, or portion of code that comprises one or more executable instructions to implement the specified function(s). If the programming is embodied in hardware, each block may represent a circuit or a number of interconnected circuits to implement the specified function(s). Embodiments of the present invention may be implemented in any computer-readable medium for use by or in connection with an instruction execution system such as a computer/processor based system or other system that can fetch or obtain the logic from the computer-readable medium and execute the instructions contained therein. A "computer-readable medium" can be any medium that can contain, store, or maintain programs and data for use by or in connection with the instruction execution system. More specific examples of a suitable computer-readable medium would include, but are not limited to, a portable magnetic computer diskette such as floppy diskettes or hard drives, a random access memory (RAM), a read-only memory (ROM), an erasable programmable read-only memory, or a portable compact disc.

Allowable Subject Matter

3. Claims 15-16 and 31-32 are allowed.
4. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach the claimed subject matter of claims 15 and 31; therefore, claims 15 and 31 are allowable for the reasons pointed out by Applicant's remarks (see p. 4, "Allowable Subject Matter", first 2 sentences). In addition, with the Amendment to the Specification in Examiner's Amendment, Applicant has overcome the rejection under Section 101 for claims 31 and 32.
5. It follows that claims 16 and 32 are then inherently allowable for depending on an allowable base claim.
6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CHARLOTTE M. BAKER whose telephone number is (571)272-7459. The examiner can normally be reached on Monday-Friday 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Edward Coles can be reached on 571-272-7402. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
